# March PI meeting

3/19/2025

# Attendees

# **Agenda**

1. Reminder of three phases and where we are. Reviewed the goals and the clinical leads

# 2. Reviewed CQM Data

a. Saw improvements in several measures and many staying the same. We only saw referrals with a reduction

| Screening and Preventive Care Measures             | Jan | Feb | 2025 Goal |
|--|-----|-----|-----------|
| Height and Weight Assessment and Health Counseling | 46% | 47% | 50%       |
| Cervical Cancer Screening                          | 52% | 53% | 55%       |
| Colorectal Cancer Screening                        | 34% | 34% | 35%       |
| HIV Screening                                      | 74% | 74% | 77%       |
| Tobacco Use: Screening and Cessation Intervention  | 70% | 72% | 74%       |

| Chronic Disease Management                   | Jan | Feb | 2025 Goal |
|--|-----|-----|-----------|
| Controlling High Blood Pressure              | 60% | 61% | 65%       |
| Diabetes: HbA1c Poor Control (>9%) [inverse] | 32% | 32% | 31%       |

| Additional HCH Priorities  | Jan                                | Feb                                | 2025 Goal                          |
|--|------------------------------------|------------------------------------|------------------------------------|
| Closing the Referral Loop (% Completed Referrals)  | 39%                                | 35%                                | 40%                                |
| SDH Ask Rate   | 32%                                | 32%                                | 50%                                |
| Flu Vaccinations   | Offer Rate: 59%<br>Admin Rate: 48% | Offer Rate: 59%<br>Admin Rate: 48% | Offer Rate: 75%<br>Admin Rate: 50% |
| Suicide Assessment and Safety Plan   | 30%                                | 31%                                | 85%                                |
| Prescribing Antibiotics for Upper Respiratory Infection (URI) and Acute Bronchitis (YTD) | 100%                               | 100%                               | 100%                               |
| Hospital Readmission   | 13%                                | 13%                                | 12%                                |

#### 3. Reviewed PI measures

- a. Saw improvements in Breast Screening; surpassed depression screening and saw a large jump (3%) for HTN for black and AA women.
- b. Client Experience and Third Next available are recently approved goals, and we have begun work on these
- c. Flu goal will come back around for 25-26 season

| PI Measures                           | Jan     | Feb     | 2025 Goal        |
|---------------------------------------|---------|---------|------------------|
| Breast Cancer Screening               |         |         |                  |
| (Ages 40 – 74)                        | 44%     | 44%     | 46%              |
| Depression Screening and Follow-Up    |         |         |                  |
| Plan                                  | 54%     | 57%     | 55%              |
| Hypertension Disparity (Black/African |         | 56%     | 57%              |
| American Females)                     | 53%     | 30%     | 37/6             |
|                                       |         |         | Fallsway Avg: 21 |
| Third Next Available                  | 26 days | 27 days | days             |
|                                       |         |         |                  |
| Client Experience                     | -:      | 4.57    | 4.81             |

#### **Breast Cancer Screening**

Other Preventive: (Cancer Screening) By December 31, 2025, increase the percentage of women aged 40 – 74 years old who had a mammogram to screen for breast cancer to 46%. Additionally, increase screening percentages by 5% for Black/African American and White women to more equitably align with Agency average.

- Working to reduce disparities for black and white women
- Have seen some slight improvements for those who are white, however, reduction for those who are Black/African American and Hispanic/Latina

Current: 44%

Goal: 46%

### **Disparity Current:**

B/AA: 34% (goal: 40%)
W: 29% (goal: 31%)

• H/L: 61%

- We have completed process mapping, key gap areas, which have included:
  - challenges in connecting with clients,
  - o transportation needs,
  - challenges with navigating external appointments.
- conducted a literature review that found the importance of patient education, risk assessments, and navigation.
- Have created client questionnaire and working on logistics to roll out (goal is to interview 12 clients)

#### Depression Screen and follow-up plan

Behavioral Health (Depression): By December 31, 2025, improve the percentage of clients 12+ years old screened for depression, and if/when positive have a documented follow up plan, to 55%.

- Surpassed goal at 57%! Now working towards stretch goal of 60%
- Did data analysis and found that those with missed screening were seen in medical space (81% missing screening)
- Pilot intake packet that included a PHQ-9 with other forms
  - o Created instruction sheet with MA feedback, which has helped clients

# **Hypertension Disparity**

Chronic or Acute (Hypertension): By December 31, 2025, improve hypertension control rates (less than 140/90 mmHg) for Black/African American women to 57% to more equitably align with the Agency's other racial, ethnic, and gendered populations.

• Baseline: 52% (July 2024 TY)

• Goal: 57%

Current: 56%

| Race/Ethnicity/Gender        | Baseline Comparison (July 2024 TY) |
|------------------------------|------------------------------------|
| Agency Average               | 62%                                |
| Black/African American men   | 62%                                |
| Black/African American women | <mark>52%</mark>                   |
| White men                    | 73%                                |
| White women                  | 63%                                |
| Hispanic/Latino men          | 72%                                |
| Hispanic/Latina women        | 69%                                |

- Continue to see Black/AA women below Agency goal and average
- The team has conducted literature review that showed discrimination and racial stress impacting BP, CHW as key players, focus on healthy and fresh food access
- Also completed BP measurement observations and focus on standardization and measurement
- Additional actions include process mapping, conducting a medication algorithm review, and conducting client interviews
  - Focusing on standard work including in measurement and medication
  - Client interviews found 71% had MH diagnosis and 51% connected to provider;
     vast majority reported
  - Healthy foods, stable housing, transportation are the biggest environmental influences on mental and physical health
- Next steps: HTN RN shadowing and Root Cause Analysis

# Third next available

By December 31, 2025, improve the **Fallsway location time to third next available appointment to an average of 21 days** (includes Behavioral Health, Dental, Medical, and Psychiatry departments).

- Baseline: 24 days (December 2024 TY)
- Goal: 21 daysCurrent: 27 days
  - Just beginning work; met as a small team and working on information gathering

- Shadowed call center manager around template change processes
  - Found challenges with dental
  - Challenges with templates being late and how that impacts appointment scheduling
- Completed department meetings
  - o Found that issues in scheduling are a driving factor in access
  - Interested in focusing on slot utilization education and improved communication

#### Influenza Vaccination

- This will focus on our work for 25-26 season! More to come

#### **Client Experience**

By December 31, 2025, improve the average level of client satisfaction survey for "rate your level of satisfaction during your recent visit of the person who you assisted during the check-in process" to 4.81 (scale of 1 to 5, 5 being the highest).

Baseline and current: 4.57 (Feb 2025; trailing 4 months) Goal: 4.81 (50th percentile)

- Experience navigating health center was scoring lower surrounding the interaction with the check in process
- We're in the 25<sup>th</sup> percentile and found that this measure is correlated with overall experience at organization
- Working with key partners in the ops space around workplace prevention

#### 4. Review of PI tools

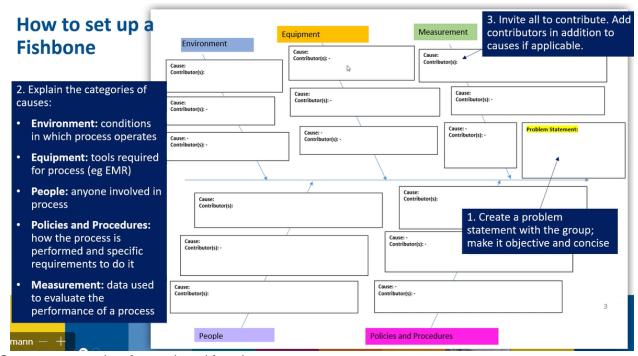

a. Focus on Root Cause analysis approaches

PI Tool: Root Cause Analysis (Fishbone and 5 Whys)

| Fishbone Diagram or<br>Cause-and- Effect Diagram | <ul> <li>Used to identify and visualize potential causes of a specific problem/effect</li> <li>Helps systematically identify and analyze root causes by thinking about categorized causes</li> <li>Performed in team settings for different perspectives</li> </ul> |
|--|---|
| The 5 Whys                                       | Used to identify the root cause of an issue by repeatedly asking "why?" – typically 5 times  Uses the problem back to its critical and decering   |
|  | <ul> <li>Helps trace the problem back to its origin vs. addressing the symptoms</li> <li>The goal is to dig deeper into the cause of a problem instead of solving surface-level issues</li> </ul>   |

- We use fishbone diagrams often ID potential causes to an event or issue
  - Works well in a team-based setting

- 5 Why's help to ID root causes by asking Why, trace problems back to origin instead of symptoms
  - o Goal is to dig deeper into problem vs. solving surface level
- It is important to set ground rules and avoid people blaming, rather focus on the process or system
- If someone is having challenges, it is more than likely that someone else would also struggle with the system as it's broken
- Shared resources for fishbone and reviewed how to conduct a fishbone

- Gave an example of a car breaking down
- Did a group exercise on Climate Change; allowed team to give examples of what contributes to climate change.
  - Reminded around facilitation that sometimes there will be some silence, allow time and space for people to contribute

Next meeting: April 16th, 2025
